Ford 2006 F250 air conditioning problem - A/C wasn't working; had it repaired by local mechanic. He replaced a vacuum module on the right passenger side firewall but I suspect it isn't hooked up correctly because when I put it in 4-wheel drive, the a/c only blows out the defrost vents. The a/c is also performing poorly - air isn't very cold and the air is moist even though, before it was ...

Air conditioning issue: in turning on the air conditioning in my f250 Ford truck this year it did not cool the cab. In taking it to a mechanic to see what was the problem. I was told that 3 technical bulletins had been issued on the a/c unit. Unless there was a problem, no one would have checked the a/c. Bulletins 06-17-12, 08-13-5 and 08-13-5 - lack of a/c cooling due to deficant material ...

Air Conditioner Problems of the 2006 Ford F-250
The air conditioning system, or AC system, on your Ford F-250 should give you years of trouble-free performance. The AC system uses compressed refrigerant to cool the cabin when you turn the air conditioning on. If this system fails, it is normally due to a leak at the compressor.

2006 Ford F-250 A/C Is Blowing Out Of Defrost: 5 Complaints
Generally speaking, air-conditioning problems in Ford vehicles have their roots in two specific systems: the air management system and the refrigerant cycling system. The air management system is the first which should be checked, because some of the problems are relatively simple to diagnose. For example, if the buttons and controls don't work, show too much resistance, or show little to no ...
