According to the definition stated in the 7th edition of the AJCC cancer staging handbook, the masticator space primarily consists of the muscles of mastication encompassed within the superficial layer of the deep cervical fascia and extends from the medial and lateral pterygoid (MP/LP) muscles to the masseter and temporalis muscles (Fig. 2 A).

Used by physicians and health care professionals worldwide to facilitate the uniform description of neoplastic diseases, the fully revised and updated Seventh Edition of the AJCC Cancer Staging Handbook brings together all currently available information on staging of cancer at various anatomic sites and incorporates newly acquired knowledge on the etiology and pathology of cancer.

The American Joint Committee on Cancer's Cancer Staging Manual is used by physicians throughout the world to diagnose cancer and determine the extent to which cancer has progressed. All of the TNM staging information included in this Sixth Edition is uniform between the AJCC (American Joint Committee on Cancer) and the UICC (International Union Against Cancer). In addition to the information found in the Handbook, the Manual provides standardized data forms for each anatomic site, which can be utilized as permanent patient records, enabling clinicians and cancer research scientists to maintain consistency in evaluating the efficacy of diagnosis and treatment. The CD-ROM packaged with each

Manual contains printable copies of each of the book's 45 Staging Forms.

Significantly expanded, expertly and beautifully illustrated, The AJCC Cancer Staging Atlas, 2nd Edition, offers more than 600 illustrations created exclusively for this new edition and is fully updated to reflect the concepts discussed in the 7th Edition of both the AJCC Cancer Staging Manual and its companion Handbook. This Atlas illustrates the TNM classifications of all cancer sites and types included in the 7th Edition of the Manual and visually conceptualizes the TNM classifications and stage groupings. Specifically designed for simplicity and precision, the drawings have been verified through multi-disciplinary review to ensure accuracy and relevancy for clinical use. Every illustration provides detailed anatomic depictions to clarify critical structures and to allow the reader to instantly visualize the progressive extent of malignant disease. In addition, nodal maps are included for each site, appropriate labeling has been incorporated to identify significant anatomic structures, and each illustration is accompanied by an explanatory legend. The AJCC Cancer Staging Atlas, 2nd Edition, is an official publication of the American Joint Committee on Cancer, the recognized international leader in state-of-the-art information on cancer staging. This Atlas has been created as a companion to the updated 7th Edition of the AJCC Cancer Staging Manual, which continues to disseminate the importance of anatomical and pathological staging in the management of cancer. This state-of-the-art, invaluable 2nd Edition includes a CD containing PowerPoint slides of all illustrations, additional color, and a user-friendly, easy-to-read layout. The AJCC Cancer Staging Atlas, 2nd Edition will serve as an indispensable reference for clinicians, registrars, students, trainees, and patients.

Prognostic Factors Grid - Cervix Uteri

In the model of the popular AJCC Staging manual and AJCC Staging handbook with the EZTNM module, this new product combines the AJCC Staging Atlas with a CD containing all the illustrations from the Atlas. Having the figures from the Atlas available as PowerPoint® slides means that users can document the "why" and "how" of their staging decisions. Users can also import figures into presentations for tumor boards, grand rounds, presentations, and journal articles/book chapters.

This book highlights the unique aspects of oncologic ophthalmology as a medical and surgical discipline practiced at a comprehensive cancer center. Multi-disciplinary management of ocular, orbital and adnexal cancers are highlighted using simple and tried-and-true algorithms. In addition, ocular problems caused as a direct result of cancer treatment are reviewed using illustrative photographs and case presentations. The content is provided by full-time ophthalmology faculty and fellows at M. D. Anderson Cancer Center. Experts in complementary disciplines such as ophthalmic pathology, dermatopathology, radiation oncology, radiology, and other surgical subspecialties have brought their unique perspective to each chapter. The book is abundant with clinical photographs as well as interesting case presentations that will help the clinician correctly diagnose cancers of the orbit, eye, and adnexal structures, initiate appropriate management, as well as recognize and treat common ocular complications of cancer therapy.

The TNM System is the most widely used classification of the extent of local growth and regional and distant spread of cancer. The 1992 revision of the fourth edition agreed upon by all national TNM committees, includes: changes made by FIGO in 1989/1990; an updated classification of urological tumours; and new classifications of small intestine carcinoma and pleural mesothelioma. In addition, ICD-O codes have been updated according to the 1990 second edition.

TNM Classification of Malignant Tumours, 7th Edition provides the latest, internationally agreed-upon standards to describe and categorize cancer stages and progression. Published in affiliation with the International Union Against Cancer (UICC), this authoritative guide contains important updated organ-specific classifications that oncologists and other professionals who manage patients with cancer need to accurately classify tumours for staging, prognosis and treatment. The major alterations addressed in the 7th Edition concern carcinomas of the oesophagus and the gastroesophageal junction, stomach, lung, appendix, biliary tract, skin, and prostate. In addition, there are several entirely new classifications: gastrointestinal carcinoids (neuroendocrine tumours) gastrointestinal stromal tumour upper aerodigestive mucosal melanoma Merkel cell carcinoma uterine sarcomas intrahepatic cholangiocarcinoma adrenal cortical carcinoma. A new approach has also been adopted to separate anatomical stage groupings from prognostic groupings in which other prognostic factors are added to T, N, and M categories. These new prognostic groupings, as well as the traditional anatomical groupings, are presented for oesophageal and prostate carcinomas. Visit www.wileyanduicc.com for more information about the International Journal of Cancer and our other UICC book titles

The American Joint Committee on Cancer's Cancer Staging Handbook is used by physicians throughout the world to diagnose cancer and determine the extent to which cancer has progressed. All of the TNM staging information included in this Sixth Edition is uniform between the AJCC (American Joint Committee on Cancer) and the UICC (International Union Against Cancer). Organised by disease site into 48 comprehensive chapters, this new edition has completely revised and updated the old classification system to provide a new, evidence-based guide to cancer staging. This new TNM Classification will be implemented world-wide on January 1st, 2003.
