Aspects of Language Contact - De Gruyter

Language contact occurs when speakers of two or more languages or varieties interact and influence each other. The study of language contact is called contact linguistics. When speakers of different languages interact closely, it is typical for their languages to influence each other. Language contact can occur at language borders, between adstratum languages, or as the result of migration, with an intrusive language acting as either a superstratum or a substratum. Language contact occurs in a v

Language contact - Wikipedia

The Study of Language Contact. "Manifestations of language contact are found in a great variety of domains, including language acquisition, language processing and production, conversation and discourse, social functions of language and language policy, typology and language change, and more. ...

Definition and Examples of Language Contact

The linguistic outcomes of language contact are determined in large part by the history of social relations among populations, including economic, political and demographic factors.

Linguistic Outcomes of Language Contact

Distinct speech sounds in language. Learning phonics will aid your child as they learn to read and write. Knowing the sounds letters make as well as the sound letter combinations make will help your child as they decode words. Semantic Knowledge: Semantic Knowledge is the aspect of language that involves word meaning and word labels.

5 Aspects of Language – Language Development

Any discussion of language contact and ensuing borrowing must take the various types of contact and the results for the languages involved into account. For the present discussion one must distinguish two basic kinds. The first is direct transfer where the effect is immediate, frequently with alteration in the structure of the recipient language. Immediate influence on closed classes of a language (morphology and syntax) presumes an intensity of contact and a lack of external constraints ...

Aspects of Language Contact. New Theoretical ...

Contact between people speaking different languages can have a wide variety of outcomes. In some cases only a few words are borrowed; in others whole new languages may be formed. The results of such contact differ according to several factors, including the length and intensity of contact between the groups; the types of social, economic, and political relationship between them; the functions which communication between them must serve; and the degree of similarity between the languages they ...

Aspects of Language Contact. New Theoretical, Methodological and Empirical findings with Special Focus on Romancisation Processes; Hispanisation.

This edited volume brings together fourteen original contributions to the on-going debate about what is possible in contact-induced language change. The authors present a number of new vistas on language contact which represent new developments in the field. In the first part of the volume, the focus is on methodology and theory. Thomas Stolz defines the study of Romancisation processes as a very promising laboratory for language-contact oriented research and theoretical work based thereon. The reader is informed about the large scale projects on loanword typology in the contribution by Martin Haspelmath and on contact-induced grammatical change conducted by Jeanette Sakel and Yaron Matras. Christel Stolz reviews processes of gender-assignment to loan nouns in German and German-based varieties. The typology of loan verbs is the topic of the contribution by Søren Wichmann and Jan Wohlgemuth. In the articles by Wolfgang Wildgen and Klaus Zimmermann, two radically new approaches to the theory of language contact are put forward: a dynamic model and a constructivism-based theory, respectively. The second part of the volume is dedicated to more empirically oriented studies which look into language-contact constellations with a Romance donor language and a non-European recipient language. Spanish-Amerindian (Guaraní, Otomí, Quichua) contacts are investigated in the comparative study by Dik Bakker, Jorge Gómez-Rendón and Ewald Hekking. Peter Bakker and Robert A. Papen discuss the influence exerted by French on the indigenous languages of Canada. The extent of the Portuguese impact on the Amazonian language Kulina is studied by Stefan Dienst. John Holm looks at the validity of the hypothesis that bound morphology normally falls victim to Creolization processes and draws his evidence mainly from Portuguese-based Creoles. For Austronesia, borrowings and calques from French still are an understudied phenomenon. Claire Moyse-Faurie's contribution to this topic is thus a pioneer's work. Similarly, Françoise Rose and Odile Renault-Lescure provide us with fresh data on language contact in French Guiana. The final article of this collection by Mauro Tosco demonstrates that the Italianization of languages of the former Italian colonies in East Africa is only weak. This volume provides the reader with new insights on all levels of language-contact related studies. The volume addresses especially a readership that has a strong interest in language contact in general and its repercussions on the phonology, grammar and lexicon of the recipient languages. Experts of Romance language contact, and specialists of Amerindian languages, Afro-Asiatic languages, Austronesian languages and Pidgins and Creoles will find the volume highly valuable.

The study of languages in contact is an ever-relevant topic in linguistics, especially at present times when increasing globalization leads to a number of new contact situations. This volume features ten papers on various aspects of language contact by leading specialists in the field. In these papers, contact-induced change in a wide variety of languages is approached from various perspectives, reflecting the current state of affairs in language contact studies. The first main theme in the volume is related to the linguistic effects of migration, both in the present and in the past, and both in the standard language spoken by ethnic minorities, and in immigrant languages that are influenced by the standard. The second theme concerns border areas, a traditional treasure trove for the study of contact phenomena. The third theme is about contact effects without physical contact, as well as the role played by translators in this

Most societies in today's world are multilingual. 'Language contact' occurs when speakers of different languages interact and their languages influence each other. This book is an introduction to the subject, covering individual and societal multilingualism, the acquisition of two or more languages from birth, second language acquisition in adulthood, language change, linguistic typology, language processing and the structure of the language faculty. It explains the effects of multilingualism on society and language policy, as well as the consequences that long-term bilingualism within communities can have for the structure of languages. Drawing on the author's own first-hand observations of child and adult bilingualism, the book provides a clear analysis of such phenomena as language convergence, grammatical borrowing, and mixed languages.

This book is a collection of original studies analyzing how different internal and external factors affect Spanish language variation and evolution across a number of (socio)linguistic scenarios. Its primary goal is to expand our understanding of how native and non-native varieties of Spanish co-exist with other languages and dialects under the influence of several linguistic and extra-linguistic forces. While some papers analyze the linguistic dynamics affecting Spanish grammars from a cross-dialectal perspective, others focus more closely on the relations established between Spanish and other languages with which it is in contact. In particular, some of these studies show how power and prestige may support (or not) the use of Spanish in different social contexts and educational realities, given that the attitudes toward this language vary greatly across the Spanish-speaking world. On the one hand, in some regions, Spanish represents the variety spoken by the majority of the population, typically related to prestige and power (Spain and Latin America). On the other hand, in other contexts, the same language is conceived as a minority variety, which may or may not be associated with stigmatized immigrant groups (i.e., in the US).

It is well-known that contact between speakers of different languages or varieties leads to dynamics in many respects. From a grammatical perspective, especially contact between closely related languages/varieties fosters contact-induced innovations. The evaluation of such innovations reveals speakers' attitudes and is in turn an important aspect of the sociolinguistic dynamics linked to language contact. In this volume, we assemble studies on such settings where typologically congruent languages are in contact, i.e. language contact within the Germanic branch of the Indo-European language family. Languages involved include Afrikaans, Danish, English, Frisian, (Low and High) German, and Yiddish. The main focus is on constellations where a variety of German is involved (which is why we use the term 'German(ic)' in this book). So far, studies on language contact with Germanic varieties have often been separated according to the different migration scenarios at hand, which resulted in somewhat different research traditions. For example, the so-called Sprachinselforschung (research on 'language islands') has mainly been concerned with settings caused by emigration from the continuous German-speaking area in Central Europe to locations in Central and Eastern Europe and overseas, thus resulting in some variety of German abroad. However, from a linguistic point of view it does not seem to be necessary to distinguish categorically between contact scenarios within and outside of Central Europe if one thoroughly considers the impact of sociolinguistic circumstances, including the ecology of the languages involved (such as, for instance, German being the majority language and the monolingual habitus prevailing in Germany, but completely different constellations elsewhere). Therefore, we focus on language contact as such in this book, not on specific migration scenarios. Accordingly, this volume includes chapters on language contact within and outside of (Central) Europe. In addition, the settings studied differ as regards the composition and the vitality of the languages involved. The individual chapters view language contact from a grammar-theoretical perspective, focus on lesser studied contact settings (e.g. German in Namibia), make use of new corpus

Access Free Aspects Of Language Contact New Theoretical Methodological And Empirical Findings With Special Focus On Romancisation Processes Empirical Approaches To Language

Linguistic resources, analyse data quantitatively, study language contact phenomena in computer-mediated communication, and/or focus on the interplay of language use and language attitudes or ideologies. These different approaches and the diversity of the scenarios allow us to study many different aspects of the dynamics induced by language contact. With this volume, we hope to exploit this potential in order to shed some new light on the interplay of language contact, variation and change, and the concomitant sociolinguistic dynamics. Particularly, we hope to contribute to a better understanding of closely related varieties in contact.

Issues in multilingualism and its implications for communities and society at large, language acquisition and use, language diversification, and creative language use associated with new linguistic identities have become hot topics in both scientific and popular debates. A ubiquitous aspect of multilingualism is language contact. This book contains twelve articles that discuss specific aspects of Contact Linguistics. These articles cover a wide range of topics in the field, including creoles, areal linguistics, language mixing, and the sociolinguistic aspects of interactions with audiences. The book is dedicated to Pieter Muysken whose work on pidgin and creole languages, mixed languages, code-switching, bilingualism, and areal linguistics has been ground-breaking and inspirational for the authors in this book, as well as numerous other scholars working on the various facets of this rapidly expanding field.

The second edition of the definitive reference on contact studies and linguistic change—provides extensive new research and original case studies Language contact is a dynamic area of contemporary linguistic research that studies how language changes when speakers of different languages interact. Accessibly structured into three sections, *The Handbook of Language Contact* explores the role of contact studies within the field of linguistics, the value of contact studies for language change research, and the relevance of language contact for sociolinguistics. This authoritative volume presents original findings and fresh research directions from an international team of prominent experts. Thirty-seven specially-commissioned chapters cover a broad range of topics and case studies of contact from around the world. Now in its second edition, this valuable reference has been extensively updated with new chapters on topics including globalization, language acquisition, creolization, code-switching, and genetic classification. Fresh case studies examine Romance, Indo-European, African, Mayan, and many other languages in both the past and the present. Addressing the major issues in the field of language contact studies, this volume: Includes a representative sample of individual studies which re-evaluate the role of language contact in the broader context of language and society Offers 23 new chapters written by leading scholars Examines language contact in different societies, including many in Africa and Asia Provides a cross-section of case studies drawing on languages across the world *The Handbook of Language Contact, Second Edition* is an indispensable resource for researchers, scholars, and students involved in language contact, language variation and change, sociolinguistics, bilingualism, and language theory.

This new volume on language contact and contact languages presents cutting-edge research by distinguished scholars in the field as well as by highly talented newcomers. It has two principal aims: to analyze language contact from different perspectives – notably those of language typology, diachronic linguistics, language acquisition and translation studies; and to describe, explain, and elaborate on universal constraints on language contact. The individual chapters offer systematic comparisons of a wealth of contact situations and the book as a whole makes a valuable contribution to deepening our understanding of contact-induced language change. With its broad approach, this work will be welcomed by scholars of many different persuasions.

The Routledge Handbook of Language Contact provides an overview of the state of the art of current research in contact linguistics. Presenting contact linguistics as an established field of investigation in its own right and featuring 26 chapters, this handbook brings together a broad range of approaches to

Access Free Aspects Of Language Contact New Theoretical Methodological And Empirical Findings With Special Focus On Romancisation Processes Empirical Approaches To Language

contact linguistics, including: experimental and observational approaches and formal theories; a focus on social and cognitive factors that impact the outcome of language contact situations and bilingual language processing; the emergence of new languages and speech varieties in contact situations, and contact linguistic phenomena in urban speech and linguistic landscapes. With contributions from an international range of leading and emerging scholars in their fields, the four sections of this text deal with methodological and theoretical approaches, the factors that condition and shape language contact, the impact of language contact on individuals, and language change, repertoires and formation. This handbook is an essential reference for anyone with an interest in language contact in particular regions of the world, including Anatolia, Eastern Polynesia, the Balkans, Asia, Melanesia, North America, and West Africa.

This volume provides a large-scale, in-depth analysis of locative structures in Nigerian Pidgin and Ghanaian Pidgin English and compares those structures to locatives in their lexifier, substrate, and adstrate languages. The work draws on new research methods for investigating substrate and adstrate influence in semantics and creole genesis.
