Much of the data available today is unstructured and text-heavy, making it challenging for analysts to apply their usual data wrangling and visualization tools. With this practical book, you'll explore text-mining techniques with tidytext, a package that authors Julia Silge and David Robinson developed using the tidy principles behind R packages like ggraph and dplyr. You'll learn how tidytext and other tidy tools in R can make text analysis easier and more effective. The authors demonstrate how treating text as data frames enables you to manipulate, summarize, and visualize characteristics of text. You'll also learn how to integrate natural language processing (NLP) into effective workflows. Practical code examples and data explorations will help you generate real insights from literature, news, and social media. Learn how to apply the tidy text format to NLP Use sentiment analysis to mine the emotional content of text Identify a document's most important terms with frequency measurements Explore relationships and connections between words with the ggraph and widyr packages Convert back and forth between R's tidy and non-tidy text formats Use topic modeling to classify document collections into natural groups Examine case studies that compare Twitter archives, dig into NASA metadata, and analyze thousands of Usenet messages

This book is a natural for a teacher study group. It is well worth the time spent reading and discussing with colleagues because the ideas it holds are basic to rethinking and transforming vocabulary teaching. -Karen Bromley Binghamton University, SUNY How do you teach students the words that are crucial to unlocking the concepts in your content area? Until now "assign, define, test" has been the default strategy. But with Word Wise and Content Rich, Douglas Fisher and Nancy Frey bring vocabulary in out of the cold and into the heart of daily classroom practice in English, math, science, and history. Word Wise and Content Rich offers a five-part framework for teaching vocabulary that's tailored to the needs of adolescent learners yet mindful of the demands on content-area teachers. Grounded in current research, this framework gives students the multiple encounters necessary to lock in the meaning of new words forever. Fisher and Frey's five-step model shows you how to: Make it intentional: select words for instruction and use word lists and up-to-date website lists wisely Make it transparent: model word-solving and word-learning strategies for students Make it useable: offer learners the collaborative work and oral practice essential to understanding concepts Make it personal: give and monitor independent practice so students own words Make it a priority: create a schoolwide program for word learning. Use Word Wise and Content Rich, and close the word gap between low-achieving and high-achieving students. With its strategies, every student in your class-in your school-can access the textbook and develop the vocabulary needed for success in content-area reading. Read Word Wise and Content Rich and get the last word on great vocabulary teaching.
