Packet Tracer - Cisco
Re: packet tracer routing help Thanks for your help, i really appreciate it. I've solved the problem successfully by changing the two servers subnet from 10.10.100.0 in 10.10.101.0

Solved: packet tracer routing help - Cisco Community
In this article, we will focus on how to configure RIP (Routing Information Protocol) on Cisco Routers. Generally in all network courses, RIP is used to explain routing protocol configuration basically. This is because of its basic configuration. You can DOWNLOAD the Packet Tracer example with .pkt format HERE.

RIP Configuration With Packet Tracer |pCisco
My static routing in packet tracer is not working with attached topology. The Router_1 does not shows any static routes though I've configured and same thing happened in Router_3 could not see the static routing when I run "sh ip route" but I could see the static routing in Router_2 routing table.

Solved: Packet tracer-Static route not working - Cisco ...
Step 1: View routing tables of R1, R2, and R3. Use the appropriate command to show the routing table of R1. RIP (R) now appears with connected (C) and local (L) routes in the routing table. All networks have an entry.
