~~Demand And Supply Integration Above The Treeline~~

Drawing on a new study, Tobias Tober highlights two conflicting effects that the integration process generates in relation to welfare spending. While economic integration increases popular demand for social spending, political integration decreases its supply, effectively breaking the link between social policy preferences and social policy output. For decades, a prominent line of critique has held that the European integration process is strongly biased towards economic interests and ...

~~Demand And Supply Integration Above The Treeline~~

The demand curve (D) and the supply curve (S) intersect at the equilibrium point E, with a price of \$1.40 and a quantity of 600. The equilibrium is the only price where quantity demanded is equal to quantity supplied. At a price above equilibrium like \$1.80, quantity supplied exceeds the quantity demanded, so there is excess supply.
