An Overview of Conducting a Functional Assessment of Challenging Behaviors

Not every child with mental health difficulties has a diagnosis. An approach that focuses on symptoms rather than diagnostic labels can help support children who could benefit from treatment.

Treating specific symptoms of autism or ADHD can help children, even without a

Four experts discuss expanding access to mental health treatment for people with mild or moderate symptoms and what we can learn from international care models.

Building Better Systems of Care for People with Mental Health Problems

"And on the other side of that privilege are all the disadvantages of not getting a diagnosis early on."

Having ADHD (like any other stigmatized mental health-related diagnosis) is not a privilege.

Privilege plays a huge role in getting an ADHD diagnosis
