Discover the joy of growing marijuana with this comprehensive guide to indoor cultivation for beginners.

This book uniquely gives the reader specific detailed instructions to immediately begin and to be successful at hydroponic indoor medical-marijuana gardening. Including necessary material and equipment lists, set-up and build-out details, information on budgeting both time and money, growth and flower cycle expectations and timing as well as how to make pre and post-harvest volume projections. The organic, pest-free gardening technique described within is a method that will provide a constant supply of medical-grade marijuana that is quickly customized to a patient's chronic pain with the ability to supply the right quantity and quality needed. Included is a large amount of commonly available how-to information frequently used by growers today as well as a great deal of how-to information that cannot be found anywhere else that required years of plant development research and experimentation. Weekly plant changes, required weekly gardening tasks, and indoor gardening tools and equipment are described. Information on things only experts know including how to read your plants and many mistakes to avoid are shared. This book has information on how plants are rotated and how to continue running the garden, if desired years into the future and applies to whether the reader is growing for themselves as a patient or growing for others as a caregiver. In addition, this book won't leave you hanging with wondering what to do once plants mature, ripen and are harvested. Rather, it contains detailed postharvest drying and curing instructions and four different methods of condensing medical marijuana, including Bubble Hash, Butter Heat Trichome Extraction, Dry Ice Powdered Hash, and a Vegetable Glycerine Tincture Buy this book today and let the author-with his instructions, descriptions and the over 110 reality photographs that show actual indoor-gardening situations-guide you on your way to success.

Decide for yourself if marijuana is right for you Manage aches and pains Gain insight on the effects and possible symptom relief Enjoy both sweet and savory edibles Navigate the legal requirements If you ' re curious about cannabis, everything you need to discover its many benefits is a page away!

This is the most accessible, attractive, and easy-to-use beginners guide to growing marijuana. In only 144 illustrated pages, High Times editor, Danny Danko, covers the basics of successful pot cultivation. This book is a primer that covers: The basics of setting up a grow room Genetics and seeds Germination Sexing Cloning Building buds Harvesting Pest, fungi, molds, and deficiencies Creating your own strain Concentrates, edibles, tinctures, and topicals This is the novice marijuana growers handbook that guides readers through the absolute essentials of cannabis horticulture to produce the most potent buds. From where to buy seeds to sowing, nurturing, and maintaining a crop, this handy Pot Bible is essential for the perfect harvest.

Growing marijuana is not only a rewarding hobby but can offer a great business opportunity as well. Changing from outdoor growing to indoor growing, from hobby grower to professional will allow you to build a scalable production with better and bigger yields than you've ever imagined. Taking methods from traditional gardening as well as growing hydroponics will help you get started growing the right way. With professional equipment and streamlined workflows you can automate and optimize your production to operate smoothly, with minimal management, at scale. In this beginner's guide we will teach you how to grow weed professionally. This is a practical introduction that will guide you through starting out with a commercial production in 2018. What this book will teach you include: How to set up an indoor grow room or grow facility How to give your plants everything they need in terms of light, water, airflow and nutrients How to grow, harvest and dry your marijuana This book will give you the Experience of the beautiful evolution from seeds to full blown yield. Grow your production from a few plants in the back of your closet to a medium or large commercial production in a professionally designed grow room If taking your growing to the next level excites you, read on now! We love working with new growers and are happy to help and offer advice based on our experience setting up some of the largest grow operations in the country, like this one with over \$30 million in annual revenue, and this one which will do twice that much when finished. Growing outdoor will leave your plants at the mercy of environmental circumstances and mother nature - for the better or for the worse. With an indoor hydroponic production on the other hand, you are in charge. Creating a grow room will allow you to influence all factors that limit or accelerate the growth of our plants, and master the art of maximize yields and return on your investment. From choosing the best grow lights to deep water culture, from fans to wall paint - we've got you covered. You need to understand that setting up the infrastructure for hydroponics might take more time and investment at the start but can produce yield levels otherwise impossible to reach. As with any business, start by reflecting on why you want to do this. What's in it for you? What are your reasons for getting started (financially, professionally and emotionally)? Research the market circumstances and legal considerations in the area you plan to operate. Your business will be very different depending on your goals: Do you want to grow medical marijuana or recreational? At what scale? And in what state? What will your team and setup look like? How many people will be involved? How much is the investment for setting up the grow room? How much are the monthly costs for water, electricity and other supplies? Can you grow in your house or do you need a commercial area? How will you be distributing your weed buds? If you are considering growing marijuana as a business - treat it like a business. Do your research beforehand. Identify your target customer and how you're going to reach them. Research the balance of supply and demand in your market -- your work will be much easier in a market that is supply constrained, so that may influence where you decide to set up your grow. What are the financial and legal risks and how can you manage these risks? Are you willing to take a legal risk or not? A business plan can help you structure your thoughts as well as forecast your cashflow. By the way: you do not have to have prior experience in growing weed to get started. What it will take is

your genuine interest in taking good care of your plants and your ability to work hard, study hard and make changes on the way according to your learnings. It's not rocket science, but it needs dedication and passion. And you can do it, too. This book is a manual to growing marijuana hydroponically.

"Manage your Grow like a Pro" The Science and Practice of Growing Cannabis in Coco Coir Coco coir is arguably the best medium to grow cannabis!
