The Paper Recycling Process - YouTube

The recycling of paper is the process by which waste paper is turned into new paper products. It has a number of important benefits: It saves waste paper from occupying homes of people and producing methane as it breaks down. Because paper fibre contains carbon (originally absorbed by the tree from which it was produced), recycling keeps the carbon locked up for longer and out of the atmosphere.

Paper recycling - Wikipedia

Many regions use single stream recycling, in which all items are collected at once, so first it's necessary to separate out basic categories like paper, plastics, and metals. Next, the plastic needs to be sorted for recycling.
