Observation Infant Child Observation - 1809 Words | Bartleby

Infant/Toddler Observation. First of all I should point out the physical state of the child. He was very active, curious, and reacted adequately to his age group in various life situations during the observation. The child was in a good mood, he smiled; there were no signs of probable illness which could be noticed in such a short period of time. The boy was in a good mood, didn't behave capriciously.
