Introducing Discourse Ysis David Nunan

TAKING CONTROL: Autonomy in Language Learning focuses on an area of language learning and teaching that is currently receiving an increasing amount of attention ...

An introduction to research methods intended to help readers understand and evaluate research in language learning, this book presents a balanced, accessible view of a range of methods including:" formal experiments" introspective methods (including diaries, logs, journals, and stimulated recall" interaction and transcript analysis" case studiesIt emphasises the value to language teachers of reading published research, as well as initiating their own research. After completing the tasks and exercises in each chapter, readers should acquire sufficient skills and knowledge to formulate research questions, collect relevant data, analyse and interpret it, and report the results to others.

The label CLIL stands for classrooms where a foreign language (English) is used as a medium of instruction in content subjects. This book provides a first in-depth analysis of the kind of communicative abilities which are embodied in such CLIL classrooms. It examines teacher and student talk at secondary school level from different discourse-analytic angles, taking into account the interpersonal pragmatics of classroom discourse and how school subjects are talked into being during lessons. The analysis shows how CLIL classroom interaction is strongly shaped by its institutional context, which in turn conditions the ways in which students experience, use and learn the target language. The research presented here suggests that CLIL programmes require more explicit language learning goals in order to fully exploit their potential for furthering the learners' appropriation of a foreign language as a medium of learning.

This book evaluates the origins of processes of change in language teaching in China, and the factors influencing their success. Examining diverse experiences and drawing on the perspectives of academics from the top institutions in the country, the authors analyse the complex interplay between global and local influences on language policies. Encouraging discussion of the significant education reforms that have taken place in China in recent years, this work will be of interest to students and scholars of language education, English as a Second Language and applied linguistics.

This carefully crafted collection provides a snapshot of the evolution of David Nunan's theoretical and empirical contributions to the field of second language education over the last 40 years. The volume focuses on the development of his work on second language curricula, and in particular, the work for which he is best known: learner-centered education and task-based learning and teaching. David Nunan has been a language teacher, researcher and consultant for 40 years. He has lived and worked in many countries, principally in the Asia-Pacific region, but also in the Americas, Europe and the Middle-East. In addition to his research and scholarly work, he is the author of several major textbook series for the teaching and learning of English as a foreign Language. These texts are based on his task-based language teaching approach, and are widely used in schools, school systems and universities around the world.

Exploring Second Language Classroom Research is a comprehensive introductory manual for beginning and advanced researchers. Authored by two leading experts in the field, the text explores research traditions and processes. The text is illustrated with a variety of qualitative and quantitative data and includes tasks for reflection and application.

This new edition surveys the major approaches and methods in language teaching.

A clear and practical introduction to second language acquisition, written for students encountering the topic for the first time.

The book examines the development and maintenance of a minority language, engaging on both micro and macro levels to address open questions in the field. Guardado provides a history of the study of language maintenance, including discussion of language socialization, cosmopolitan identities, and home practices. In particular, the author uses 'discourse' as a primary tool to understand minority language development and maintenance.

Advanced language learning has only recently begun to capture the interest and attention of applied linguists and professionals in language education in the United States. In this breakthrough volume, experts in the field lay the groundwork for approaching the increasingly important role of advanced language learning in the larger context of multilingual societies, globalization, and security. This volume presents both general and theoretical insights and language-specific considerations in college classrooms spanning a range of languages, from the commonly taught languages of English, French, and German to the less commonly taught Farsi, Korean, Norwegian, and Russian. Among theoretical frameworks likely to be conducive to imagining and fostering instructed "advancedness" in a second language, this volume highlights a cognitive-semantic approach. The theoretical and data-based findings make clear that advanced learners in particular are characterized by the capacity to make situated choices from across the entire language system, from vocabulary and grammar to discourse features, which suggests the need for a text-oriented, meaning-driven approach to language teaching, learning, and research. This volume also considers whether and how information structuring in second-language composition reveals first-language preferences of grammaticized concepts. Other topics include curricular and instructional approaches to narrativity, vocabulary expansion, the demands on instructed programs for efficiency and effectiveness in order to assure advanced levels, and learners' ability to function in professional contexts with their diverse oral and written genre requirements. Finally, the volume probes the role and nature of assessment as a measurement tool for both researching and assessing advanced language learning and as an essential component of improving programs.
