This book teaches beginners how to create well-designed software using Java and prepares them for both the A and AB advanced placement tests in Java. With a focus on object-oriented programming, teaching objects first and then writing classes, the authors identify the material, within an introduction to Java and a case study, that will be featured on the AP tests. Any student preparing to take the AP test in Java.

Inspired by the success of their best-selling introductory programming text, Java Software Solutions, authors Lewis, DePasquale, and Chase now release Java Foundations, Second Edition. This text is a comprehensive resource for instructors who want a two-or three-semester introduction to programming textbook that includes detail on data structures topics. Java Foundations introduces a Software Methodology early on and revisits it throughout to ensure students develop sound program development skills from the beginning. Control structures are covered before writing classes, providing a solid foundation of fundamental concepts and sophisticated topics.

With lab exercises covering important topics in all 12 chapters, this lab manual will accompany the Fifth Edition of the Lewis and Loftus, Java Software Solutions. The exercises provide hands-on experience with programming concepts introduced in an introductory programming course. Manual solutions and source code are available online.
