The 21-Day Low FODMAP Smoothie Challenge is ideal for people with Irritable Bowel Syndrome (IBS), who want to introduce healthy low FODMAP smoothies in to their diet. This medically researched diet helps people with IBS, and other digestive issues, minimise gastrointestinal symptoms and improve well-being. This unique smoothie challenge is gentle on the tummy and provides a complete 3 week regime of smoothie meal plans, shopping lists and smoothie recipes. This eBook has been created by Clare and Larah. Clare is a qualified naturopath, nutritionist and medical herbalist with 15 years experience in the health industry. Intolerant to gluten and dairy herself, Clare has a unique understanding of how to treat digestive issues, including IBS. Larah was diagnosed with Irritable Bowel Syndrome (IBS) in 2013. Prior to her diagnosis, she spent several years suffering from a myriad of seemingly unrelated symptoms. After being diagnosed, a specialised dietitian suggested to follow a low FODMAP diet. A couple of weeks later her symptoms were practically gone, and since then Larah has only had a few episodes of IBS symptoms. She now keeps her symptoms at bay by basing her diet around 85% low FODMAP foods. This eBook came from Larah's realisation that eating low FODMAP does not necessarily mean eating healthy, and that a lot of people (Larah included) try to replace high FODMAP 'junk' with low FODMAP 'junk', missing the opportunity to start a healthier diet.

A diet plan proven to relieve symptoms of irritable bowel syndrome and other digestive disorders—presented by the world's leading experts and tailored to you “A must-have survival guide” —Gerard E. Mullin, MD, Associate Professor of Medicine and Director of Integrative GI Nutrition Services at the Johns Hopkins University School of Medicine “What can I do to feel better?” For years, millions of adults who suffer from irritable bowel syndrome (IBS) have asked this question, often to be met with scientifically unfounded or inadequate advice. The low-FODMAP diet is the long-awaited answer. In clinical trials, over three quarters of people with chronic digestive symptoms gain significant relief by reducing their intake of FODMAPs—difficult-to-digest carbs found in foods such as wheat, milk, beans, soy, and certain fruits, vegetables, nuts, and sweeteners. In *The Complete Low-FODMAP Diet*, Sue Shepherd and Peter Gibson explain what causes digestive distress, how the low-FODMAP diet helps, and how to:

- Identify and avoid foods high in FODMAPs
- Develop a personalized and sustainable low-FODMAP diet
- Shop, menu plan, entertain, travel, and eat out with peace of mind
- Follow the program if you have IBS, celiac disease, Crohn's disease, ulcerative colitis, or diabetes, and if you eat a vegetarian, vegan, low-fat, or dairy-free diet.

And, with 80 delicious low-FODMAP, gluten-free recipes, you can manage your symptoms, feel great, and eat well—for life.

FODMAPs, a broad variety of naturally occurring carbohydrates found in many plant-based foods, can wreak havoc on sensitive digestive systems, especially in people who have irritable bowel syndrome and other functional bowel disorders. Pinpointing and eliminating FODMAPs while maintaining nutritional excellence can be especially challenging for vegans, because FODMAPs are found in an extensive range of common foods and ingredients that are most popular among vegans. In this groundbreaking resource and cookbook, Jo Stepaniak lays bare not only the FODMAPs vegans with IBS need to avoid, but also the wide assortment of nutritious plant-based foods that are generally well tolerated. Easy-to-read tables and shopping lists arm readers with all the information they need to navigate the supermarket and purchase kind-to-the-gut fruits, vegetables, grains, nuts, seeds, beverages, and condiments. The 70 scrumptious low-FODMAP recipes will help readers prepare spectacular seasonings as well as mainstays for breakfast, lunch, dinner, and snacks, so they can stay healthy and satisfied

The worldwide bestseller - 1/4 million copies sold 'Written by a World Barista Champion and co-founder of the great Square Mile roasters in London, this had a lot to live up to and it certainly does. Highly recommended for anyone into their coffee and interested in finding out more about how it's grown, processed and roasted.' (Amazon customer) 'Whether you are an industry professional, a home enthusiast or anything in between, I truly believe this is a MUST read.' (Amazon customer) 'Informative, well-written and well presented. Coffee table and reference book - a winner' (Amazon customer) 'Very impressive. It's amazing how much territory is covered without overwhelming the reader. The abundant photos and images are absolutely coffee-table-worthy, but this book is so much more. I think it would be enjoyable for an obsessed coffee geek or someone who just enjoys their java.' (Amazon customer) For everyone who wants to understand more about coffee and its wonderful nuances and possibilities, this is the book to have. Coffee has never been better, or more interesting, than it is today. Coffee producers have access to more varieties and techniques than ever before and we, as consumers, can share in that expertise to make sure the coffee we drink is the best we can find. Where coffee comes from, how it was harvested, the roasting process and the water used to make the brew are just a few of the factors that influence the taste of what we drink. Champion barista and coffee expert James Hoffmann examines these key factors, looking at varieties of coffee, the influence of terroir, how it is harvested and processed, the roasting methods used, through to the way in which the beans are brewed. Country by country - from Bolivia to Zambia - he then identifies key characteristics and the methods that determine the quality of that country's output. Along the way we learn about everything from the development of the espresso machine, to why strength guides on supermarket coffee are really not good news. This is the first book to chart the coffee production of over 35 countries, encompassing knowledge never previously published outside the coffee industry.

The internationally renowned, clinically tested, revolutionary diet program to lose weight, fight disease, and live a longer, healthier life. Can what you eat determine how long, and how well, you live? The clinically proven answer is yes, and The Longevity Diet is easier to follow than you'd think. The culmination of 25 years of research on ageing, nutrition, and disease across the globe, this unique combination of an everyday diet and fasting-mimicking diet (FMD) to be done only 3-4 times per year lays out a simple solution to living to a healthy old age through nutrition. FMD does away with the misery and starvation most of us experience while fasting and helps you reap all the beneficial health effects of a restrictive diet while avoiding the negative stressors, like low energy and sleeplessness. Valter Longo, Director of the Longevity Institute at USC and the Program on Longevity and Cancer at IFOM in Milan, developed THE FMD after making a series of remarkable discoveries in mice and humans indicating that specific diets can activate stem cells and promote regeneration and rejuvenation in multiple organs to reduce the risk for diabetes, cancer, Alzheimer's and heart disease. Longo's simple pescatarian daily eating plan and the periodic, fasting-mimicking techniques can both yield impressive results. Low in proteins and sugars and rich in healthy fats and plant-based foods, The Longevity Diet is clinically proven to help you: Lose weight and reduce abdominal fat Make simple changes which can extend the healthy lifespan Prevent age-related muscle and bone loss Build your resistance to diabetes, cardiovascular disease, Alzheimer's and cancer Longo's healthy, life span-extending plan is based on an easy-to-adopt pescatarian plan along with the fasting-mimicking diet 4 times a year, and just 5 days at a time. The Longevity Diet is the key to living a longer, healthier, and more fulfilled life.
