The Nile Mosaic of Palestrina, dating to c. 100 B.C., presents a unique and enigmatic picture of Egypt. This study demonstrates that the mosaic depicts rituals connected with the yearly inundation of Egypt, and will explain how it was that such scenes could be found in Central Italy at this early date.

Globalization has fundamentally changed the game of business. Strategic frameworks developed for the analysis of purely domestic business necessarily fall short in the international business context. Managers and business students require alternative approaches to understand and cope with these far-reaching changes. We must learn to think globally in order to succeed. Global Competitive Strategy shows how we can do this by providing a unique set of strategic tools for international business. Such tools include the 'star analysis' that allows strategy makers to integrate geographic information with market information about the global business environment. Also introduced is the 'global value connection' that shows managers how to account for the gains from trade and the costs of trade. Aimed at MBA students taking courses in international strategy, consultants and practising managers with responsibility for strategic development, this 2007 book offers a comprehensive strategic framework for gaining competitive advantage in the global marketplace.

The New Public Health has established itself as a solid textbook throughout the world. Translated into 7 languages, this work distinguishes itself from other public health textbooks, which are either highly locally oriented or, if international, lack the specificity of local issues relevant to students' understanding of applied public health in their own setting. This 3e provides a unified approach to public health appropriate for all masters' level students and practitioners—specifically for courses in MPH programs, community health and preventive medicine programs, community health education programs, and community health nursing programs, as well as programs for other medical professionals such as pharmacy, physiotherapy, and other public health courses. Changes in infectious and chronic disease epidemiology including vaccines, health promotion, human resources for health and health technology Lessons from H1N1, pandemic threats, disease eradication, nutritional health Trends of health systems and reforms and consequences of current economic crisis for health Public health law, ethics, scientific d health technology advances and assessment Global Health environment, Millennium Development Goals and international NGOs
