contrary to popular belief many children do have immature neuromotor skills without more serious pathology, and that this is directly linked to underachievement in education and other areas.

## *Neuromotor Immaturity in Children and Adults - INPP*

Boys, girls, men, women, from the age of four (in certain circumstances) to seventy-plus – we can help anyone who is suffering from emotional or physical problems relating to retained reflexes and neuromotor immaturity. Fewer than 60% of the children we see, have had a formal diagnosis of any named disorder; most are brought to us simply on parental instinct.
